

THE GLEICHEN CALL

VOLUME XXVIII NO. 14

GLEICHEN, ALBERTA, WEDNESDAY JUNE 19, 1935

SUBSCRIPTION \$2.00 PER YEAR

COUNCIL GIVE CONSIDERATION ELECTRIC FRANCHISE

The last regular meeting of the Town Council held was attended by the Mayor and all the councillors. A. R. Yates and R. A. Brown attended the meeting. Mr. Yates stated that he had come to request the council to put on a night watchman. Both their stores had been broken into several times. They were paying a business tax and were entitled to protection. He also suggested that the R. C. M. P. look after the C. P. R. park and keep any loafers on the move.

A letter had been received from the Board of Trade in connection with this and also one from Inspector Davin of the R.C.M.P., Calgary.

The mayor advised the council that they would give this request due consideration and give them an answer. Commissioner Davidson then took place among the councillors. During this time a night watchman was employed and after a vote being taken the motion was carried.

It was finally decided on motion of W. McConnell and A. R. Macdonald that the police commission investigate the burglar alarm system of the Union School or any other system with a reasonable cost and if they find anything reasonable to call a special meeting during the day and consider what would be done.

The franchise agreement had been lying on the table for some time and the council were of the opinion that something should be done about it. It was suggested that the by-law should be given the first reading and sent to the Utilities Board with their request. The secretary was instructed to advise the Utilities Board that the townspeople want a domestic combination water which was suggested by the Calgary Tower Co. as one time but not put into the agreement. This was supposed to be a rate rate of six dollars for the use of 250 h.w. ft. Also that the council be granted an option to reduce the street lighting from 3' to 30. So by-law No. 210 was given its first reading.

It was announced that the graveling of the highway through the town was finished. Some of the councillors expressed the opinion that a poor job had been made of it.

The secretary stated he had written the Board of Trade for permission to move the cook house at the tourist camp. The Board of Trade replied that the council could do with the building as they thought it. The matter was left in the hands of the water works committee since they could use the number in various ways.

It was stated that there were several places in town where the graveling was up. This matter would be attended to. All town properties had been advertised in the Gazette and the sale would take place in August.

The Tax Consolidation Act for 1935 came up for discussion. This Act was passed at the last session of the legislature. If any municipality wished to put it into force they had to pass a by-law before September 1, 1935 and to submit same to the minister for approval. By-law No. 271 was then introduced and passed after the third reading.

The Council decided to engage the government grader to re-grade the streets of the town. The cost of this will be \$3 per hour.

The council decided that nothing would be done towards fixing up the camp grounds. The council will not be represented at the Union of Alberta Municipalities convention to be held towards the end of the month. Irrigation water was to be left on night and day so that the irrigators of the town could water their gardens any hour of the day or night. The secretary was instructed to supply the men on relief so that they could Engineer Lester with the names of work it out. It was also left in Mr. Lester's hands to plan the work.

THE WEEK AT OTTAWA

(By F. W. Gershaw)

The western members feel that they have at last convinced the powers at Ottawa that the primary producers have certain real claims. The Eastern industrial concerns have had a very great advantage in the protection

News Items of Local Interest

Joe Royal, a Blackfoot Indian, well-known about town since Sunday, Years ago Joe clerked for the Hudson Bay Company in Calgary. Often in those days he was sent by the company to Gleichen with blankets to trade with the Indians. In later years when pay day came for the Indians Joe would be seen in the counters of the Ramsey Mercantile Co. helping to cope with the rush of business the red men created. He should be easy to remember for he always had several thin queues of hair hanging from his head to the wonderment and admiration of his white friends. Joe Royal was very well educated and could handle and count money as fast as the white man.

Dr. A. C. McGugan, Provincial Medical Officer of Health, will be appointed to administer the first test area to be set up under the health insurance bill enacted at the last session of the legislature. Hon. George Headley, Minister of Health, stated this test area probably will be set up at Canmore, which district has applied for the scheme, declared the minister.

Mr. M. Murray, secretary-treasurer of the town, dropped into this office Monday morning and announced that the trustees have re-elected all the teachers of the Gleichen schools for the term 1935-36. They are Principal J. E. Gorrell, Asst. Prin. H. B. Myers, Miss L. M. Martin who will teach Grades 7 and 8, Miss M. Van Vollenburg, Grades 4, 5 and 6; Miss P. L. Birdson, Grades 1, 2 and 3. Mr. Murray added just before he left that after the holidays the school would be closed for the first time since September 2. Doubtless the pupils will hate the thought of when school will open again.

Dominion Day in Alberta this year will definitely bring to an end the long and profitable career of the devils commonly known as "slot machines". From that day forward these machines will be distinctly a no by law, and will be liable to

decommission will ever be set up competent to go into the field and determine whether or not the factory is run efficiently. Extravagance and inefficiency will grow, develop and keep on developing as long as the monopoly exists, and experience has shown that many times the result of a competition will force it to be efficient to a degree a commission or regulation could never attain.

configuration wherever the rare illegally existing. The slot machines are ruled out by the new act passed at the recent session, and will come into force on July 1st, announces Hon. J. F. Lyburn, Attorney-General. The act prohibits the keeping of these machines, and enables any peace officer to seize with out warrant a slot machine he finds on any public premises. It also enables such an officer to search any private premises on warrant where he believes such machines may be kept. The definition of "Slot Machine" in the act is wide enough to cover pin ball machines, baseball, golf and whiffle machines and in fact any machine the result of any number of operations of which is a matter of chance and is capable of being used for gambling purposes.

The old cook house at the tourist camp is to disappear. This shanty is rarely if ever used as tourists. On the other hand the road riding and other undesirable tourists find it a wonderful place in which to sleep and spend a few days vacation.

A local man admits that what attracted him to the girl who eventually became his wife was the fact that she was familiar with all his yarns. Many a man, on the other hand, takes care to choose a wife who isn't.

Junior farmer camps at the large exhibitions will be a feature this summer, made possible by the new federal grant in aid of this work. Alberta expects to have seven of these camps in operation, at the two large exhibitions at Calgary and Edmonton, also at Red Deer, Lethbridge, Canmore, Vegreville and Vermilion. These camps will be under the supervision of officials of the Provincial Department of Agriculture, and a large number of farm boys and girls are expected to participate.

At an auctioneer's banquet recently held no one dared to nod during the speeches in case it cost him money.

no commission will ever be set up competent to go into the field and determine whether or not the factory is run efficiently. Extravagance and inefficiency will grow, develop and keep on developing as long as the monopoly exists, and experience has shown that many times the result of a competition will force it to be efficient to a degree a commission or regulation could never attain.

VETERAN MOUNTIES CELEBRATE JUBILEE AT CALGARY—JULY 8

It was sixty years ago this year that the first troop of the N. W. M. Police arrived at the banks of the Bow River where the Elbow River discharges into it. The records do not show just how many were in that body but it was under the command of Insp. Brisbane and Sub-Insp. Cecil Denny. They had started from Medicine with the intention of locating a fort at a suitable spot on the Bow River but through an error they must have crossed that river and got to the Red Deer River before the mistake was discovered. They turned south again until the river was reached from North Hill. To cross the river it was found necessary to jash tapuallas around the wagon boxes and float them across. Mr. G. C. King, the retired postmaster at Calgary, is credited with being the first policeman to land on the site of Calgary. He jumped ashore with a rope to make fast the floating wagon box. Many baffles were to be seen and a lone tent was shrouded in the distance. This turned out to be Father Doucet, a Roman Catholic priest who was making his way south and hoping to evade the war-like Blackfeet. One can imagine his joy at meeting the policemen. This was the year 1875. It was not long before a fort was built on the banks of the two rivers. The I. G. Baker Company of Benton, Montana, were employed to haul the supplies to the new site and assist in building the fort. This company decided to open a store of their own and it was not

GIRL GUIDES ENROLL MEMBERS AND OFFICERS

An interesting Girl Guide ceremony was held at the home of Mrs. W. McConnell when District Commissioner Mrs. G. H. Goodenham enrolled Mrs. Adie as Captain of the Ranger Division, First Gleichen Company of Girl Guides, and at the same time, Guide Captain Mrs. Don Swain enrolled Peggy Yates, Betty and Virginia Taylor, Jean McConnell, Freda MacCallum, Alison Evans and Marie Michael as Rangers.

A Guide Cook party consisting of Mary Downey, Louise Alstott, Marjorie House, Phyllis Halstead and Irene Young, added a touch of color and solemnity to the occasion.

The ranger movement in Gleichen is going ahead vigorously and it will not be long before we see another smartly uniformed company of local girls out on parade.

Long before some of the policemen took their discharges as their time expired. These in their turn opened businesses of their own. This town progressed so well that by 1885 it was incorporated and an exhibition board was formed and functioned that year.

It is for the purpose of celebrating these two events that the City of Calgary and Exhibition and Stampede Ltd. have invited all ex-members of this famous force to attend a reunion at Calgary.

This is to be no playhouse affair. In the first place the Calgary Herald has kindly permitted the veterans to use their old office in the Southern Bldg., to be converted into their Headquarters and beds will be furnished for the use of those veterans who prefer to sleep there and recall the old barracks-rooms of years gone by. The only difference will be that there will be a modern building and no log shanties. The beds will be made of poles.

The Jubilee and Stampede will start the morning of Monday morning will be a mammoth parade in which every ex-member of the Force is invited to take part. The Hudsons Bay Co. has consented to put in a suitable float for the veterans. Transportation will be furnished for the veterans in the parade and beds will be furnished for the use of those veterans who prefer to sleep there and recall the old barracks-rooms of years gone by. The only difference will be that there will be a modern building and no log shanties. The beds will be made of poles.

The Stampede is to be opened by Major General Sir J. H. MacBrien, Commissioner of the R. C. M. Police and a musical ride, similar to that shown at New York last year, will be presented. Altogether this will be most enjoyable.

Particulars of the veterans' participation can be obtained from J. N. K. Secretary to the Jubilee Committee, 3009, 17th Street W. Calgary.

"SALUDA" TEA

Vacation Days

That happy period in childhood, the mid-summer school holidays, is near at hand. With shouts of joy, laughter, and on running feet the boys and girls of Canada will announce to all the world "School's out," and they will toss their books aside to be forgotten for a couple of months.

In these later days much is heard of shorter working hours, more leisure for the workers of the world, and all kinds of proposals are advanced as to how those leisure hours may be spent in order that they may prove a blessing rather than a drawback in the development of a better type of citizen; in order that they may add to the pleasure and true enjoyment of life rather than tend towards pure idleness and even shiftlessness.

Now, with two months of absence from school for their children, what are Canadian parents planning for those energetic boys and girls to keep them out of mischief and to make this vacation time freed from study wholly beneficial and an asset which will prove of value in better health, clearer minds, and a most wholesome outlook on life, in a word, prepare these citizens of the future to return to the school rooms some weeks hence keen for another period of study and preparation for life?

Older boys and girls are already home from college, annual church conferences and assemblies have been held, nurses' graduation from hospitals are completed, examinations of all kinds are nearing an end, teachers, too, will be free of their duties, spring work on the farm is past, and in town and city the quiet time in business is at hand. Thus the older generation is able to devote more time and more thought to making these happy days of childhood a real joy and blessing not only to the children but to themselves.

And so the question arises, and ought to be faced, what can we do individually and collectively to make the summer vacation of 1935 a never-to-be-forgotten period in the lives and memories of Canada's boys and girls—your own boys and girls? It is a responsibility to be discharged, just as it is a pleasure to be derived by those who discharge the responsibility. And this combined responsibility and pleasure for parents, and unalloyed pleasure for children, should not be neglected this year especially, following, as it does, so many years of economic distress and for many in this western country, disastrous crop failures and business reverses.

Fortunately, it does not cost much in money to give children a good time, a happy holiday. Fortunately, again, Canada is blessed by Nature with almost innumerable beauty spots for holiday purposes. There is not a province in Canada which does not abound in lakes, large and small; summer resorts and camping grounds are numerous, places to camp and picnic are to be found in easily accessible places. Full advantage should be taken of these to provide outings for the boys and girls, even though individual circumstances may make such outings of brief duration.

In summer time especially Canada is a land for out-of-doors. Get the boys and girls out into the open, and keep them there as much as possible. They are in school rooms and shut up in houses in the winter time for long months of the year; they need the health-giving properties of the sun throughout the summer holiday season, the clean, invigorating fresh air, the happiest moods and most beautiful dreams.

And make these vacation days of lasting benefit in other ways. See that the boys and girls are taught to swim. It is little less than a crime that so many Canadian boys and girls never learn to swim, and so many tragedies result which are so easily preventable. The art of swimming should be a part of every child's education. It is not only one of the best forms of exercise, making for the development of muscle; it is not only a source of great pleasure, but it is a preparation for emergencies that may arise in their own lives or in the lives of others.

Unconsciously, too, the work of the school room can be carried forward. Powers of observation can be developed and strengthened during vacation days spent in the open; habits of cleanliness, neatness, orderliness, can be made a part of camp and holiday life, and accepted as part of the fun, which will stand children in good stead in future years; initiative, ideas in handicrafts, resort to simple invention to meet the lack of usual equipment at home—all these things mean a greater all-round development of character.

An elaborately organized holiday is not necessary, neither should much expense be entailed. Get out with the children and rough it for a while. They will enjoy it just as much, perhaps more, than an expensive trip or outing where everything is planned and arranged for them. To a large extent, the boys and girls should do a full share of the camp or holiday work. Properly organized and time systematically divided between these duties and the hours of play, boys and girls will enjoy and benefit from doing the camp chores.

Forget the motor car occasionally, and spend a day on a hike. Older lands know the delights and benefits of a walking tour or a day's hike, which Canadians have not learned to appreciate. Try one this year with your older boys and girls.

Think up other things and ways in which this holiday season can be made happy, healthful and useful. Vacation days present an opportunity to get closer to your children than is possible in the busier days of the year. It is an opportunity for you to study them; ascertain their weaknesses, or strengths; gain their confidence in larger measure; learn of their ambitions, and as a result be in a better position to mold their characters along right lines, and check tendencies and habits, hitherto un-noted by you, which would prove a handicap to them, and a possible source of future worry and sorrow to yourself as well as to them.

Problem For Astronomers
Mars, where weather extremes are almost an hourly matter and life-giving oxygen is virtually non-existent, has presented a new problem to the astronomers of this world by producing what seems to be snow out of season.

Pupils in the middle grade of schools in China have been ordered to take military training.

Lloyd's Insure Vinny Pilgrimage

Stress Necessity of Making Early Bookings

The Canadian Legion announced today that Lloyd's of London, England, have insured the Vinny Pilgrimage, to be held in July of next year, against abandonment in the event of war, financial panic or other untoward events.

Bookings are pouring into the steamship companies. Hope is expressed by Legion officials that service men realize the necessity of registering early in order to be certain of accommodation.

"It is difficult to impress a veteran with the idea of making a ten dollar deposit now when he knows he can pay the full hundred and sixty dollars when the time comes," said Captain Ben Allen, Dominion organizer, to the press today. "Early bookings are necessary, however, so that we can get enough ships to take care of the thousands who intend going."

"And Pilgrims only are going to be allowed to sail in this Peace Armada. Also we must arrange early for billeting accommodation and rail and motor transportation in France. The naval, military and civil authorities in France, Belgium and England are extending us every co-operation. It looks like Canada's year in Europe next year."

Held Up By Robin

Nesting Bird Delays Altering Of Huge C.N.R. Sign

Plans to alter a huge electric sign fronting the Canadian National station in Winnipeg were thwarted out of consideration for a mother robin whose nest is attached to the letter 'P'.

Word of a new sign designed to replace the old had been carefully worked out. Electricians were summoned and all was in readiness to dash out the attractions of summer excursions. Then office workers who had seen the bird sitting on her four eggs reported to officials, and it was decided, excursions or no excursions, Mrs. Robin must not be disturbed.

Meantime efforts were being made to work out a sign which would leave the "P" in its present position.

Latest Life-Saving Net

Device For Use At Sea Was Successfully Tested

An ingenious life-saving net which experts state will minimize peril of the sea has been demonstrated at Cardiff.

The invention is a raft consisting of tubular cork bags made into a net lashed with rope. It is produced by a Cardiff ship-building firm.

It can be unrolled down a ship's side to serve as a ladder, or floated alongside foundering or burning vessels in conditions which would make the launching of an ordinary lifeboat impossible.

Orders have been received from liner and "tramp" firms. The device is expected to form the basis of a new industry.

Marriage In Finland

Canadian Bronco Buster Reported To Have Won Daughter Of Tom Mix

Ruth Mix, daughter of Tom Mix and Harry Knight, champion Canadian bronco buster, eloped to Reno, Nev., where they were married, said a telegram from Knight received at Hollywood by Tex Austin, promoter of cowboy contests.

"We tied the knot to-day," read the message.

Miss Mix, whose father is famous for cowboy roles on the screen, formerly was married to Douglas Gilmore, an actor. Their marriage was annulled at Middleton, N.Y., in July, 1932.

Knight's home is at Banff, Alta.

New Story For Ripley

Here's one for Ripley, "Believe It Or Not," but it's a fact anyway. A. Youngblut, of Oxford County, Ont., found a large potato with others in his cellar that had started to sprout. Nothing unusual in that, but the sprout had turned around and gone into the potato again near the surface, coming out at the other end, extending for about two inches.

A Full-Time Job
What are the functions of a lieutenant-governor? asks a constitutional writer. In Manitoba, says the Winnipeg Tribune, the duties start daily, Sundays included, somewhere around 8 a.m., and last frequently until the clock turns to a.m. of the following day. Not more than a thousand organizations of one kind and another have their eye on the governor as a prospective guest at one of more events.

Butterfly Hunter

Man To Travel 4,000 Miles To Pursue Life-Long Hobby

At the age of 73 Walter Dannatt, a retired business man of London, will leave shortly to travel a thousand miles up the Amazon in pursuit of his lifelong hobby of butterfly collecting.

Mr. Dannatt has a remarkable collection of butterflies and moths, numbering more than 13,000, and he hopes to add to it considerably as the result of his new venture.

"I keep fit by cycling," Mr. Dannatt added. "I have had the same machine for 30 years, and have traveled more than 150,000 miles on it. One week-end I covered more than a hundred miles."

"Before I bought my present machine I had the first safety bicycle in the country."

On the subject of his hobby, Mr. Dannatt said: "Some of my specimens come from as far as the Solomon Islands. The collector who secured them was repeatedly driven off by cannibals in attempting to land. He at last succeeded by brandishing a revolver."

Boosting Bay Route

First Vessel To Be Chartered For 1935 Season Is The Ashworth Of The Dalgleish Line

Announcing the Ashworth of the Dalgleish line is the first vessel to be chartered for the 1935 season. Brigadier the On-to-the-Bay Association, at the On-to-the-Bay Association, at Winnipeg, forecast a record year for grain exports over the Hudson Bay route.

More ships would visit Churchill, Manitoba's northern seaport, this season than any season previously. General Patterson said, judging from the numerous inquiries received from persons in different countries, General Patterson said many tourists would visit the port this year.

The Ashworth will leave England in time for the official opening of the Hudson straits and is expected to dock at Churchill shortly after the opening date, August 10. The Ashworth will bring cargo to Churchill from Newcastle, Antwerp and Liverpool.

Royal Military College

List Of Western Graduates, And Those Receiving Diplomas

Corporal Ian Mondell Drum, Victoria, B.C., graduated from Royal Military College with honors.

Other Western cadets who graduated are: Cadet Gordon Dale Macallister, Regina; Cadet Edward Maurice Hodson, Rosthern, Sask.; S.M. John Alexander Hornbush, Calgary; Cadet John Deane, Victoria; Cadet Murray Duncan Lister, Calgary; Corporal Ronald Edward Wilkins, Penitence, B.C.; Cadet George Ross Davidson, Camrose, Alta.; Sergt. Robert Summers Stronach, Calgary; Cadet John Henry Desmond Barrett, Victoria.

The following will be awarded diplomas after satisfactorily passing supplementary examinations: Cadet Thomas Alfred McPherson, Victoria; Corporal William Carroll Patterson, Calgary.

For Anglo-American Amity

Eight Thousand Former Residents Of British Empire Hold Gathering At Los Angeles

Upwards of 8,000 former residents of the British Empire, enough to make a small city, plunked at Los Angeles, California, in observance of the silver jubilee of King George.

The outdoor luncheon grounds of Lincoln park saw a gathering of people from all parts of the empire.

Francis E. Evans, British consul and guest of honor, pleaded for Anglo-American amity and declared that at such a season of English rejoicing international ties should be even closer between former British subjects here and abroad. John Tappan, vice-president of the Sons of St. George, was another guest of honor.

Started Apple Industry

On tiny Belle Isle near Annapolis Royal, Nova Scotia, Pierre Martin planted several small trees 302 years ago, which he had brought to the new world with him from Normandy. From this small plantation, the famous Annapolis valley apple industry arose.

Vitamin Exhibit

Science Produces Crystals Which Have Strong Potency

A new vitamin pain killer, pure vitamin "B" made into crystals which give wholesale relief from neuritis, was announced to the joint convention of the Canadian and American Medical Association at Atlantic City.

These crystals are a recent new product of science and so potent that one the size of a pinhead is equal to 100 cakes of yeast in vitamin "B" effect.

A pinhead or less, per day is the dose of this pure vitamin which cured or relieved 90 per cent. out of 100 cases of neuritis, the first human beings to receive this new vitamin treatment.

The same tiny dose of pure vitamin "B" cured some cases of human diabetes.

The vitamin exhibit was made by M. G. Vorhaus, M.D., who did the medical work; R. R. Williams of Columbia University, who produced the pure crystalline vitamin; and R. E. Waterman and Sidney Bankowitz. All are from New York City.

"B" is known as the nerve vitamin, the lack of which causes beriberi. But that it could cure neuritis was unknown. Physicians never had enough of it to try out before.

Girl's Ruse Feels Thief

Recovers Jewel From Robber By Clever Trick

A young woman in Shanghai, China, who refused to be alarmed when a thief snatched a pearl earring valued at \$1,000 from her ear, recovered the jewel by a ruse as clever as it was daring.

As she started to run away, the woman reached for the other earring and called to him: "Here," she cried, "you might just as well take the other earring as only half of it for them." The robber, hurrying a stream of inventive at her and all other women who were imitation jewelry, tossed the earring he had snatched into the street and left.

Tuberculosis Seals

Receipts Twelve Per Cent. Higher Than In 1933

Receipts from the Christmas seal sale of the Canadian Tuberculosis Association were 12 per cent. higher in 1934 than in 1933. It was reported as an association report dictated by Toronto.

Saskatchewan, New Brunswick, Montreal and Hamilton had notable increases.

Research awards to junior staff members in Canadian sanatoriums and clinics, for 1934, follow: Dr. C. F. Bennett, Fort St. John, Sask.; Dr. A. R. Boyd, Vancouver.

All Done By Hand

A. E. W. Mason, the famous novelist and dramatist, who is 70 years old, is one of the few popular writers of to-day who insist on dictating their work to a secretary or use a typewriter. He carefully plans every detail of a story before he begins to set it down on paper, then writes it all in his small but neat and perfectly legible script. Generally he writes a few chapters at a time, reviews them, and so on until the book is complete.

Little Journeys In Science

BROMINE

(By Gordon H. Chast, M.A.)

Bromine was discovered about a century ago by the French scientist Balard. The element occurs in nature as bromides, chiefly as magnesium bromide and sodium bromide, which are found in many springs and salt deposits. The Stansfeld deposits in Germany and the salt waters of Michigan and Ohio are richest in bromides. Sea water also contains small amounts of bromides.

Bromine is prepared commercially by the electrolysis of a solution of bromide or by treating solutions of bromides with the more active element chlorine.

In recent years the demand for bromine has greatly increased due to its use in the preparation of a compound called ethylene bromide. This compound is a constituent of ethyl alcohol.

An effort is being made at the present time by scientists to obtain additional supplies of bromine from the bromides in sea water. Sea water contains about seventy parts of bromide in a million of water, which means that about 3,000 gallons of water must be treated to secure a pound of bromine. To recover bromine from sea-water, a ship was equipped capable of recovering 10,000 pounds of the element per month. It has been reported that the trial trip of this vessel was quite successful, and as a result of this rather large scale experiment a plant has been built on the Atlantic coast for the extraction of bromine from the ocean. The success of this venture has suggested the possibility of extracting gold from sea water in a similar way.

Bromine is a dark-red fuming liquid with a very disagreeable odor. Bromine vapor attacks the eyes very painfully and produces great irritation when inhaled. It is about three times as heavy as water and is moderately soluble in water.

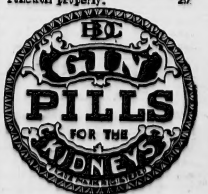

Bromine is a compound produced when bromine combines with other elements. Those of potassium and sodium are used in photography as the sensitive material on the plate. Bromine is also used in the preparation of important dyes. Considerable quantities of bromine are used in the manufacture of tear-gases, or lacrymators.

A Channy Court

"The Campbells are coming!" was a fitting slogan in Chongou, Ont., the other day, says the Toronto Star Weekly. The Campbellford police court is held in Chongou, and on the bench was Magistrate W. A. Campbell, the accused was Thomas Campbell, and the police officer who laid the charge was D. Campbell of Campbellford.

Step Forward In Medical Science

New Method For Treating Cerebral Deformities Is Demonstrated

A brain wash which straightens out some of the most cruel and twisting human deformities was demonstrated at the scientific exposition of the joint meeting of the American Medical Association and the Canadian Medical Association held at Atlantic City.

There also was a new antiseptic developed at the Ford hospital, far more powerful than anything now in medical use for human tissues. The brain wash has been used on, and cured cases of infantile paralysis, St. Vitus dance, sleeping sickness, syphilis meningitis and tuberculous meningitis. It has relieved, but not cured, locomotor ataxia.

All these are brain troubles, in which some part of the brain, or central nervous system, becomes inflamed due to infection.

The wash is plain salt and water. It is the method of use rather than the "medicine" which gets the results. The demonstration was made by George M. Retan, M.D., associated professor of pediatrics, Syracuse University College of Medicine.

The salt solution is injected into a vein. At the same time a hollow needle is inserted into the spinal cord to draw off fluid. The salt water dilutes the blood, which washes the inflamed areas, in these cases the brain. The washing carries off waste, which passes from the brain down the spinal cord to be drawn off through the needle.

The new antiseptic reported from the Ford hospital is described as a medical miracle — an unexpected potency arising from putting two weak antiseptics together.

One is tannic acid, its rating as an antiseptic one. The other is hexylresorcinol, its antiseptic rating 46. But together they rate 210 to 250 (which means that many times stronger than carbolic acid). The highest power antiseptic now in general use rates 200. There are still more powerful antiseptics, but they can not be used on human tissues, because they are too poisonous. This one is harmless.

Cattle Market

Boycott Of Beef By Jewish Consumers In U.S. Causes Concern

Boycott of beef by Jewish consumers in the United States has caused grave concern among Alberta livestock interests. It was reported in Calgary. Few people recognize the importance of the United States market, Jack Byers, manager of the Western Livestock Growers, said.

The effect on the export of Canadian cattle to United States has been considerable and with the British market closed and not expected to resume this year, the export market is inactive.

Joking Customer—"How much are your four-dollar shoes?"
Smart Salesman—"Two dollars a foot."

A new gasoline on the market is made entirely from natural gas.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and happiness. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really fit yet when the day's work is done you are too tired to enter into the good times of other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too!

Made Elevator Possible

Century Of Birth Of C. R. Otis Falls This Year

The century of the birth of Charles R. Otis, who perfected many of the devices that made the modern elevator possible, falls this year. It should serve to remind New Yorkers of the wonders of a system by which, in the metropolis alone, an average of 12,000,000 persons are carried daily to the heights of skyscrapers and brought safely down again.

When Elzaba G. Otis, father of Charles, invented in a little shop at Yonkers a device called a safety hanging machine he could hardly have envisaged the elaborate system of which he laid the ground-work. He died in 1881, leaving his sons Charles and Norton to develop his hand-power hoist and to carry on the business. They had a hard row to hoe, for it was generally believed that the man who entered an elevator took his life in his hands. Only their success in interesting a wealthy soap manufacturer in their plans enabled them to keep going.

Aware of the significant relation between height of buildings, rental values and the possibilities of their father's invention, they labored diligently to reduce the risks of elevators to the vanishing point. In the late '70s they made a great advance by placing on the market the vertical type of geared hydraulic elevator.

The first building in New York to be equipped with it was the old Stevens Hotel on Eleventh street. Later they developed and put into operation in a Fifth avenue building the first electric elevators that proved successful; these could rise at the rate of 400 feet a minute. The Bessemer process, by making possible the production of steel ribs for skyscrapers at low cost, aided the plans of the Otis brothers, and the installation of elevators in New York and Chicago was accelerated.

Now the company founded by the Otises turns out over 5,000 electric elevators annually. In this city alone there are now over 40,000 such elevators, while the national total runs to over 130,000. The former rate of speed has been trebled, yet the sensation of which passengers used to complain has been eliminated. New Yorkers usually take for granted the device which made the skyscraper era possible; only when a strike of operators is threatened, as was the case last winter, do they reflect on the paralysis that would afflict business if elevators were put out of operation.—New York Sun.

The Family Car

Many Things Happen, But It's Always Up To Dad
There is a family down our way. Who have a motor car. And when there's bills to pay There's no need to seek far To find the owner. All agree That Father is the man to see.

When mother has a business date Into a nearby town, 'Tis almost certain she will state: "I drove MY motor down!" But when the tanks are out of gas The ownership to Dad will pass.

When either of the boys feel that They'd like a little spin, They "phone the girls: "We'll bring OUR car."

And you can't help right in it. But if the Dads are punctured flat The car is Dad's—no doubt of that.

Why, even Daughter takes her turn As owner of the bus. Until the engine starts to burn Or breaks kick up a fuss. The ownership then drifts to Dad—It's always his when things go bad.

They're quite a decent bunch, you know, And don't intend to cheat, But cannot take, when troubles grow, The blither with the sweet.

When it runs fine, the car is theirs: It's Father's when it needs repairs. —W. U. Latonell in Canadian Motorist.

A Good Description

When the pipe band of a certain regiment of Scots played for the first time on Church Square, Pretoria, South Africa, a kaffir listening to the band was asked what he thought of it.

After a few seconds' consideration he replied "Plenty no good, boss. No beginning, no middle, no finish. All one like."

Willie's mother thought him delicate, and so he was excused gymnastics at school.

Uncle: "What do you do while the others are in the gymnasium?" Willie: "I go in the park and play football." 2103

Veteran Newspaper Man

E. H. Macklin, Newspaper Executive, Is Honored By Press Men From All Over Canada

Edward Hamilton, active for half a century in newspaper work and one of the most picturesque newspapermen on the continent, was honored at Winnipeg at a dinner in the Manitoba Club by his fellow directors of the Canadian Daily Newspapers Association and The Canadian Press. Forty-five newspapermen from all parts of Canada were present.

The veteran newspaper executive, for many years president and general manager of the Winnipeg Free Press, referred to the gathering as "the finest body of newspapermen who ever thrust their feet beneath a table in Canada." H. P. Robinson of the Saint John Telegraph-Journal and F. J. Burd of the Vancouver Province acted as joint chairman.

In proposing the toast to Mr. Macklin's health, Mr. Robinson said the fact so many prominent Canadian newspapermen had come to Winnipeg two days before their annual meetings testified to the esteem and affection in which Mr. Macklin was held by his colleagues.

Other speakers were A. W. Robb of the Halifax Herald, Henri Gagnon of Quebec Le Soleil, P. D. Ross of the Ottawa Journal, John W. Duff of the Winnipeg Free Press, M. E. Nichols of the Winnipeg Tribune, Thomas Miller of the Morning News and J. H. Woods of the Calgary Herald.

After being presented with a piece of silver, Mr. Macklin made an acknowledgment in which he recalled the early days of co-operative news gathering in Canada.

THE RHYMING OPTIMIST

By Alice Michaels

GREAT JOYS

Laughter is for little joys, Childhood's thoughts are naive, All the bubbling merriment Of this whirling earth. Words are for the joys that last But an hour or so, Flitting on so lightly we Know not where they go.

But the great joys; Silence comes Hand in hand with these; Speed could have no part to play In their mysteries; Only, on a sudden, light Dazzles to the eyes. Only, for an instant, wings Soaring through the skies!

Award For Physicians

Annual Recognition For Canadian Doctors For Notable Achievements

Establishment of a "Victoria Cross" for Canadian physicians was voted by the council of the Canadian Medical Association, meeting in its 66th annual session with the 76th annual session of the American Medical Association.

The award, to be known as the Frederic Newton Claiborne Starr medal, will be available annually to a member of the Canadian Medical Association for achievement in the field of medical science. It will be analogous to the Victoria Cross, according to Dr. T. C. Routley, general secretary of the association.

Dr. Starr was an outstanding member of the association for 40 years, and during that time devoted himself to the development of the society. "In honoring him in death the association honors itself," Dr. Routley said.

Seventy-five members of the council representing physicians from Halifax to Vancouver gathered at the initial meeting.

Tree Provides Food

Produces Nuts Which Look Like Eggs When Cooked

A rare tree providing food in the property of George Grant, a resident of Somerset Parish, Bermuda. When he is short of eggs to accompany his morning bacon, he goes into his garden and picks one from a tree. The tree bears a fruit, the size and color of a pomegranate. The fruit bursts open when ripe and "lays" a nut about the size of a hen's egg yolk. Mr. Grant cooks this for five minutes when it turns a beautiful golden yellow. Garnished with white sauce it looks exactly like a hard-boiled egg. Mr. Grant is the only man in the colony with such a tree. It was brought there years ago by his father. It is native of Africa, where it is called the Akoe.

The individual who thinks he knows it all has the most to learn.

Japan exported over \$12,000,000 worth of pottery last year.

BABY'S OWN SOAP

Enjoyed by five generations of Canadians.

New Remedy For Headache

More Meat In Diet Effective In Some Cases

Meat is a remedy for headaches! That's the latest announcement. Of course, not meat itself, but a larger amount than usual in the daily diet, with a corresponding decrease in starches and sugars. Many bodily disturbances, which are given various names, are now treated by change in diet rather than by drugs. The high meat diet has been found effective in certain cases of epilepsy. On the other hand in some cases of nephritis, which is caused by an affection of the kidneys, the amount of meat is limited. In diabetes, meat and other proteins are comparative ly high, even when insulin allows a moderate amount of starches and sugars.

For the general diet the total amount of protein food usually advised is enough to provide about 10 per cent. of the calories needed for the day. This gives a liberal amount to replace tissue which is worn out by use of the muscles. While the larger amount under ordinary conditions is not harmful, an overabundance may crowd out fruits and vegetables which supply important minerals and vitamins.

Because protein foods are generally expensive, it is economical to use sugars, starches and fats to supply the energy material which is needed for the work of the body machine in keeping it running and for the extra calories, the need for which depends upon the occupation.

With a well rounded diet, headache will usually be a thing of the past. Unless there is some special disturbance which makes them chronic. In this case, the doctor may advise the high meat content mentioned above.

Grain For United States

Heavy Exports From Western Canada, Shown By Report

More than 1,000,000 bushels of Canadian wheat were shipped from Western Canada to the United States during the 13 months ended April 30, 1934, according to a return filed in the House of Commons by Hon. R. C. Matthews, minister of national revenue. The information had been asked by John Vallance (Lib., South Saskatchewan).

Manitoba and Saskatchewan were the heaviest exporters of barley, rye, wheat, oats, hay and straw to the United States in that period, with Alberta and British Columbia sharing to a small extent.

Figures were as follows: Barley, 285,687 bushels; rye, 1,139 bushels; wheat, 1,051,594 bushels; oats, 50,942 bushels; hay, 41,109 tons, and straw, 56,220 tons.

North Has Great Future

"I think Edmonton is a very fine city and I predict a great future for northern Alberta, especially the Peace River country," Major C. H. Douglas, author of the Douglas social credit plan and for the past month advisor to the Alberta government, said in Montreal before sailing on the Aurania for England.

When Canada goes migrate, the more powerful birds take turns leading the flight.

He gives best who gives without waiting.

Keep Record Of Graduates

Careers Of Alberta's Commercial Students Followed Up

Business men of Alberta, who seek university graduates for their office or field staffs, will be aided by the directory of Alberta. Under the direction of Dr. W. C. Wallace, president, leading firms will be given information about the qualifications of graduates seeking a commercial course in life.

Investigation into careers of the university's school of commerce graduates resulted in reports on 97 of the 127 men and women graduated from the institution since it started in 1923. They are employed in Alberta, Toronto, Vancouver, the United States and one in Honolulu. Some have taken up teaching; others are engaged in secretarial work; in the Canadian trade commission offices and in general commercial fields. One graduate took up farming.

The survey showed that only seven of the 127 graduates had married since leaving the commercial school.

Vimy Pilgrimage

Lady Haig To Attend The Vimy Memorial Unveiling

That Lady Haig will be present at Canada's unveiling of the War Memorial at Vimy next July was announced to-day by Brigadier General Alex Ross, Dominion president of the Canadian Legion.

"I am so grateful to you for your kind letter which has reached me regarding the Canadian Pilgrimage in 1934," wrote Lady Haig. "It will be a wonderful gathering to unveil that beautiful memorial, and I shall feel much honored that the members of the Canadian Legion of the War Empire Service League have allowed me to accompany them."

Canada's Peace Army, registration to date is now over a thousand and expected to reach twenty times that figure, will attend the unveiling of Canada's War Memorial at Vimy Ridge in July of next year in the presence of representatives of the British and European as well as Canadian and United States governments.

Rewarded With Fortune

Lonely Bachelor Leaves Little Nurse Home And Money

Because she looked after an old bachelor when he was dying, the 15-year-old daughter of a family at Qualicum Beach, B.C. has now a fortune of over \$30,000.

For five months Benjamin Muhler had been sick. Every day the girl would go from her home, close by, to the small house of the bachelor and look after his needs.

A short time before his death the bachelor told his little nurse that he would leave her his house and two acres of land on which it stood. He never told her of the fortune that was in store. In fact, no one in the district thought that he had any money.

When the old man died and was buried, the will was read. His whole estate, which included the house and grounds and \$20,000, was left to his little nurse, who is the oldest of five children.

British Film Stars

Leave Hollywood In Compliance With Immigration Regulations

Foreign born film players have to watch the United States immigration requirements closely. Two of them, Thomas Clark and Gerry Marco, English, have left Hollywood.

Clark, who appeared in "The Barrets of Wimpole Street," and Marco, who played in "Clive of India," declared before they left they were going voluntarily. They had been accused of overstaying their visitors' permits.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" writes:— "I have been a martyr to rheumatism for some ten years. For five years I was so afflicted that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies, I was finally advised to try Kruschen. I am pleased to say that after having used Kruschen for some twelve months, I am now free from aches and pains that I have been for some ten years. In fact I consider I am rid of rheumatism, thanks to Kruschen Salts."—W. M.

Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys and assist them to expel the dissolved uric acid needles through the natural channel.

Little Helps For This Week

"He healeth the broken in heart and bindeth up their wounds. He telleth the number of the stars and calleth them all by name. Psalm 147:3-4.

Teach me your mood O patient stars, Who climb each night the ancient sky, Leaving on space no shade, no scars, No trace of age, no fear to die.

Look up to the heavens and the quickness of the stars would seem to reproach you. "We are safe up here" they seem to say, "we shine fearless and confident, for the God who gave the primrose its rough leaves to hide it from the blast of uneven springs hangs us in the awful hollows of space. We cannot fall out of His safety. Lift up your eyes on high and behold; who hath created these things that bringeth out their host by number? He calleth them all by names. By the greatness of His might, for He is strong in power, not one faileth."

Success In Business

Depends Very Largely On How Hard One Works

There is altogether too much nonsense talked about business. The world is full of theorists, men who can tell others how a business should be operated but who have never been able to make a success of one themselves. To conduct a business successfully three things are essential; money, ability, and tremendous capacity for hard and strenuous work. It is the last of the three which contributes the greatest part to the success of a business, but it is a wise combination of the three which provides work for hundreds of thousands of men and women all over Canada.

Life Expectancy

Insurance Company Estimates Life Chances Of Quintuplets

By living through the hazards of their first year, the Dionne quintuplets overcame risks equivalent to those one woman would encounter in 51 years of life Metropolitan Life Insurance Company statisticians computed.

They estimated any one of the quintuplets had a life expectancy now of 65 years. As a group, however, the expectation was only 39 years.

A gooseberry bush bearing a fuchsia flower was among the rarities exhibited at the Royal Horticultural Society's Show.

Your Family's Health is Worth Protecting

Food spoiling days are here! Are you still gambling with your family's health? It's risky business — and so expensive as well, especially when a new 1935 Electric Refrigerator can be obtained for less than 20 cents per day — is so economical to operate — **AND IS ABSOLUTE PROTECTION AGAINST FOOD CONTAMINATION.** Your family is certainly worth the small cost of this smart, modern guardian of good health.

A NEW EASY PLAN ONLY 1-25th DOWN

You need to make a down payment of only 1/25th of the cost of the refrigerator you desire, and it will be delivered to your home. The balance may be divided into 24 similar installments, payable on your electric light bill, with a carrying charge of only 50 cents per month. **THERE ARE NO INTEREST CHARGES.**

No other plan offers you such an easy way of securing the health protection of an Electric Refrigerator. You have your choice of General Electric, Westinghouse, or Frigidaire makes.

MONTHLY INSTALLMENTS

Monthly installments run from only \$5.92 for the new top opening model, to \$9.92 and \$10.08 for the first two standard models in Frigidaire, General Electric and Westinghouse makes. Down payments are 50 cents less in each case.

Town & District

Several league baseball games have been postponed during the past week on account of the heavy rains.

Owing to the almost impassible state of the roads, the K. of P. annual memorial service, which was to have been held in Standard Sunday afternoon was cancelled. Rev. V. M. Gilbert was to have delivered the address.

The Lilac Tea put on by the W. A. of St. Andrew's Church Saturday afternoon was a great success in every particular. Mrs. G. W. Evans held the winning ticket for the splendid quilt given away during the tea.

Just a suggestion. Wm. McConnell should offer a reward to anyone finding a weed in Mrs. McConnell's garden. Mrs. McConnell is a tireless worker in her garden from which she derives great pleasure. It is with justifiable pride that she shows the visitor over her place.

After being out of commission since last fall the water pipes leading into the town office has been repaired. This work was accomplished by Engineer Lester and his men. Mr. Lester stated the water pipes had been worn out with age and it had been necessary to install new ones right from the big main to the office. Mr. Murray is now the happiest man in town since he will have a plentiful supply of water always on hand to complete his abolutions.

The patrol leader, or junior Scout leader, was catching his boys on some of the finer points of first aid and rescue work in particular. "A man," he said to the smallest Scout "had fallen into the water and gone under several times. You swim out, dive, bring him up and swim with him to the shore. What would you do next?" Came the reply, "I'd run and get him a drink of water."

The local painters, Messrs. Johnson & Fleury have been busy lately painting the big barn at Old Sun School. These boys have several other house painting jobs on hand and in order to cope with the rush of work labor from five in the morning until dark. Not for many years has so much painting been done as this spring in Gleichen. It might be added here that it is simply wonderful how much the appearance of a house has been improved when a coat of paint has been applied. May this improvement keep going until every house in town is painted for many need a new coat. If all were painted our town would have a prosperous look and be the admiration of all visitors.

A. R. Yates returned home last week end from attending the druggist convention in Calgary.

Yes, pressure irrigation is rapidly changing the appearance of the town. Given another year or so the old times when he returns to town to make a visit will scarcely know the place.

Raymond Menard has been busy the past week touching up A. Gut-rath's residence with a coat of paint.

Arrangements have been completed by the government for throwing open for homestead entry at an early date of a tract comprising four townships in Ground district, according Hon. Hugh W. Allen, Minister of

Lands and Mines. The date on which homesteads can be filed has not been set, but it is expected it will be in the near future. This area, pointed out the minister, was cleared and set aside as a likely settlement area for those families moving from dried out areas of the south. However, the area didn't attract many and as the land is considered good for settlement, it will be thrown open in the regular way. The Minister said that all arrangements in connection with the action had been made and that it was expected all land would be snapped up immediately it is available.
